Dear Hiring Manager,

I am writing to express my strong interest in an engineering position at your organization. As a senior pursuing a Bachelor of Science in Aerospace Engineering with a minor in Mechanical Engineering at The University of Alabama, I bring a unique blend of academic foundation, hands-on technical experience, and a passion for innovation in aerospace systems and design.

Through my involvement with the Alabama Rocketry Association (ARA) and A.A.E.R.O., I've contributed to the full lifecycle of aerospace systems—ranging from hydrostatic testing and hot-fire evaluations of LOX/kerosene engines to propeller design, simulation, and validation using SolidWorks and ANSYS. These experiences have honed my abilities in CAD, FEA, GD&T, and real-world problem solving, all while adhering to critical safety and performance standards.

In addition to my academic and project work, I've developed strong work ethic and adaptability through diverse hands-on roles in agriculture and automotive maintenance. From managing complex mechanical systems on a farm to performing vehicle diagnostics and repair at National Tire and Battery, I've learned to think critically under pressure and work effectively both independently and in team environments.

I am eager to bring my technical acumen, strong communication skills, and collaborative mindset to an engineering team where I can contribute meaningfully while continuing to grow as a professional. I would appreciate the opportunity to discuss how I can add value to your organization.

Thank you for your time and consideration. I look forward to the possibility of contributing to your team and would welcome the opportunity to speak further.

Sincerely,

Fourie van Rooyen
