Dear Hiring Manager,

I highly support Mr. Fourie van Rooyen in his job application. Fourie is currently a senior student pursuing his Bachelor of Science degree at the Department of Aerospace Engineering and Mechanics, University of Alabama.

I first met Mr. Fourie van Rooyen when he and a team of students were conducting research on propellers and rotors under my supervision. He is currently the chief engineer in a design team in my "Senior Design" class. He has shown strong leadership and is an exemplary student in both endeavors.

He is very committed to the research, conducting the literature search, developing engineering analyses, and programming to obtain analytical results. Fourie has demonstrated to be very self-motivated and has shown an aptitude for independent research. He is also very active in communication with me on the project and is capable of presenting research ideas clearly and logically.

During his Senior Design class, he is confident to apply the knowledge he learned from the curriculum and research to the team design. He calculated the important aerodynamic performance of the designed aircraft, and is striving to predict the dynamic characteristics of their unmanned vehicle.

Based on his stellar academic achievement, I strongly support his job application.

If you need any further clarification or information, please feel free to email me at jinwei.shen@eng.ua.edu.

Sincerely,
